

Smith & DeShields, Inc.

Beauty is in the Details!

Smith & DeShields, Inc., a family-owned architectural supply business opened its doors in Boca Raton, Florida in 1957 and has since opened showrooms in Jupiter and Naples, Florida. A supplier of residential interior and exterior doors, hollow metal, hardware, custom millwork and mouldings to contractors for all commercial and residential construction and renovation projects, tenant build-outs and improvements (standard hollow metal to extreme upscale millwork and decorative hardware) are a specialty.

Additionally, Smith & DeShields' experienced sales staff is widely known as the best in the industry and work with clients from conception through completion, giving special attention to detail regarding individual requirements, budget and time constraints.

Current with the latest styles and trends, Smith & DeShields has one of the largest in-stock moulding inventories in South Florida, consisting of over 330 different profiles. You will find mouldings of any kind, size, design, and material – crown, chair rails, medallions, domes, niches, corbels, accents, embossed and carved wood and distinctive foam, as well as a complete selection of poplar, LDF, and finger-joint mouldings. "Our In-Stock Moulding catalog," says Dan Wright, general sales manager, "is a valuable resource for the trade. Available on-line with the ability to download various moulding profiles in CAD format directly into the plans of architects and builders, every product in the catalog is available and ready to be delivered directly to any jobsite."

Due to the hurricanes that afflicted Florida in the past two years, building codes are changing and products must be updated to meet Florida State and "Miami-Dade" approved guidelines. "Impact-rated" is an important feature" says Wright. "Smith & DeShields has selections that meet these requirements." When installing an impact-rated system (door, frame and hardware), the system's strength is crucial in

maintaining the integrity of a building. Any weakness in the system can cause damage to the home. Choose from exotic woods, fiberglass and stainless steel doors, interior or exterior, simple or fancy, you'll find it at Smith & DeShields. Custom capabilities include a full millwork shop with several custom lines. Upgrade an entryway to protect and beautify any residence and reflect the dramatic effect that today's architects and builders demand.

Exquisite, bold and distinctive lines of hardware will enhance the look, choose from major manufacturers – Baldwin, Ashley Norton, Omnia, Schlage, Rocky Mountain, and Emtek – to name a few.

Decorative bath and kitchen fixtures are also available at their Boca location, featuring products from popular manufacturers such as Toto, Porcher, Hangsgrohe, Rohl, Robern, St. Thomas Creations, THG, Legacy, Jado, Watermark, Americh, Maax, American Whirlpool, as well as kitchen products from Franke, Blanco and Oliveri.

A prime example of the quality and service is evidenced by a project that Smith & DeShields serviced for an expansion of a large Miami financial institution. "Smith & DeShields supplied all the doors, mouldings and trim work with a specific requirement to match the exotic wood doors and intricate mouldings," says Wright. "Upon completion, it was impossible to recognize the doors, mouldings & trim supplied by Smith & DeShields from the originals."

No other showroom features the unparalleled service and selection of architectural products, many of them local exclusives to Smith & DeShields.
